Marshal Wahl

Web Developer & Software Engineering Student

Boise, Idaho · marshalwahl85@gmail.com · github.com/mwahl1 · linkedin.com/in/marshalwahl

SUMMARY

Web developer and software engineering student who ships end to end: schema and API through to deployed interface. Experience delivering live client sites, internal business tools, and shipped game builds.

SELECTED EXPERIENCE

Freelance Web Developer

Built and launched client sites including a live medical credentialing business site — build, Netlify deploy with GitHub auto-deploy, custom domain DNS, and SSL. Delivered a full brand system (logo suite, palette, wordmark) for a billing LLC and coordinated developer access for a collaborator extending the site with a provider portal.

Independent Projects

Designed and built Proviso, a provider-tracking web app on React/Vite/Tailwind/Supabase with row-level security. Built a Flask billing automation portal (SQLAlchemy, Pandas, SQLite). Shipped Unity game builds including a procedurally generated golf sim and a collectible-card basketball game backed by Supabase.

EDUCATION

College of Western Idaho

A.A.S. in Software Development — in progress, sophomore year

Coursework in intermediate web application development, Git workflows (branching, merging, rebasing, remotes), and math/statistics including financial mathematics.

Boise State University

Bachelor's degree, Information Technology Management — planned, following CWI

SKILLS

Languages: JavaScript, TypeScript, Python, C#, Java, SQL, HTML/CSS

Front end: React, Vite, Tailwind, Bootstrap 5, jQuery

Back end & data: Flask, SQLAlchemy, Supabase, PostgreSQL/RLS, SQLite, Pandas

Apps & games: Unity 6, Jetpack Compose, Android, Node.js

Tooling: Git, GitHub, Netlify, Vercel, DNS/SSL
